ACORD Honors NxTech for their Innovative Implementation

Milford, Ohio (May 17, 2009) – NxTech, Inc. a leading provider of Real Time and Download software and services, featuring their Total Interface Solutions for Agency-Company Interface, has received the 2009 ACORD Innovative Implementation Award. The award presented to NxTech at the annual ACORD Awards luncheon at Lake Buena Vista, Florida, recognized NxTech for their work with SPARTA Insurance Company implementing and using ACORD XML standards in a unique, exceptional and innovative way that provides value to the Sparta infrastructure platform and their Program Administrator.

Improved ease of doing business through Real Time connections using ACORD standards was the goal of SPARTA in working with NxTech. Callable Rating provides SPARTA's Program Administrator with the ability to request and receive accurate, Real Time quotes by connecting their in-house policy or management system with the SPARTA policy rating system. The transfer of information already entered in the policy or management system, combined with enhancing the data stream by incorporating existing SPARTA processes and rules, saves the Program Administrator duplicate entry and allows a true, Real Time round trip quoting experience

"The coupling of ACORD standards with a customized workflow process, such as SPARTA called for, broadens the applicability of standards to help the Property and Casualty Insurance Industry in new and different ways," says Thad Bauer, President at NxTech. "To be recognized for the development and implementation of this unique process is very rewarding for all of us here at NxTech."

"I congratulate NxTech for earning this award, and applaud them for showing their ongoing commitment to the improving industry data flow through the implementation of ACORD standards," said Lloyd Chumbley, vice president, Standards, ACORD.

About NxTech, Incorporated

NxTech, headquartered in Milford, Ohio, was founded to provide technology to unlock data and integrate systems for the benefit of all participants within the insurance industry. Emphasizing Real Time straight through processing and download offerings with XML and ACORD standards, NxTech's reusable component architecture allows for a comprehensive and easily expandable solution.
