NxTech, Incorporated Receives ASCnet Achievement Award

Anaheim, CA. (September 11, 2008) – NxTech, Incorporated (NxTech) has been recognized by ASCnet (Applied Systems Client Network, Inc.) with their **Industry Standards and Initiatives Achievement Award**. The award was presented at the ASCnet TENCon annual meetings held at the Anaheim, California Convention Center on September 11, 2008.

This award was presented by Brian Bartosh, Chairperson of the ASCnet Interface Committee to Thad Bauer, President of NxTech in recognition of NxTech's achievements in helping to make insurance agency-carrier workflow easier and more efficient. NxTech provides industry experience, knowledge and resources to help P&C Carriers with the research, planning, implementation and on-going support of their agency interface initiatives for Real Time Upload and Download solutions.

"NxTech understands the value of standards and promotes the use of standards wherever possible. This ASCnet award is a testament of how using standards, industry knowledge, and NxTech's Total Interface Solution for implementations guarantees that carriers and agents reach their interface goals. Straight-through processing exists now because of implementations using these standards" said Mr. Bauer. "Being recognized with this award is truly an honor. NxTech looks forward to even more success with ASCnet and our customers in the coming years."

"Successful development and implementation includes many participants," said ASCnet Interface Committee Chair Brian Bartosh, with Top O' Michigan Insurance Agency in Alpena, Mich. "There are times when the company does not have the resources in both experience and/or time. This is where NxTech has come in. They have the resources and knowledge to help our partner companies that are committed to these efficient workflows speed up implementations. This award to NxTech was for their contributions to the process of enhancing the workflows for our members."

The Ease of Doing Business awards were generated by statistics from the U.S./Canadian Interface Report from Applied Systems and "confirmed comments and input from ASCnet members who represent the companies along with our committee members, liaisons and the chairs of our sub-committees," Bartosh said.

About NxTech

NxTech, headquartered in Cincinnati, Ohio, was founded to provide technology to unlock data and integrate systems for the benefit of all participants within the insurance industry. Emphasizing Real Time straight through processing with XML and ACORD standards, NxTech's reusable component architecture is comprehensive and easily expandable, leading to a Total Interface Solution. For information about NxTech's products and services, email NxTech@NxTechCorp.com or visit our website at www.NxTechCorp.com.
