

## **FOR IMMEDIATE RELEASE**

### ***NxTech delivers Interface for Country-Wide Insurance Company***

**Cincinnati, Ohio (January 7, 2008)** – NxTech, Incorporated, a leading provider of real-time interfaces, system integration, translation, data management and interactive web development has completed the development and implementation of an ACORD standards based interface bridge for Country-Wide Insurance Company.

Country-Wide required an interface between their policy administration system and their internal agency management system for both Personal and Commercial Auto and Direct Bill Commission statements. The Country-Wide/NxTech solution eliminates duplicate entry and improves ease of doing business by transferring information already entered in their processing system into their management system.

“From a time and accuracy standpoint, it made no sense to re-enter data,” said Walter Schlie, Vice-President and Chief Information Officer at Country-Wide. “We received a recommendation from within the industry to work with NxTech to load data into our management system. Their solution fit perfectly with our desire to pass data from one system to the other without re-entry.”

Thad Bauer, President at NxTech added, “We are finding more and more of the large Agencies, Brokers, and MGA’s that require integration solutions. With our flexible solutions, we are glad we could assist Country-Wide in the efforts to streamline their workflow.”

#### **About Country-Wide Insurance Company**

Country-Wide is a New York City based company that has offered a full line of property & casualty insurance including auto, truck, van & home to New Yorkers’ in the downstate area for 40 years. This specialization and experience allows Country-Wide, through its affiliates and business partners to offer unique and specialized MGA and TPA services to the insurance industry.
