NxTech Delivers Real Time Callable Rating Integration for SPARTA Insurance

Milford, Ohio (January 8, 2009) – NxTech, Incorporated, a leading provider of Real Time interfaces through Industry Solutions, system integration, data management, and interactive web development has completed the implementation of Workers Compensation Real Time Callable Rating Integration for SPARTA Insurance and one of its leading Program Administrators.

Callable Rating provides SPARTA's Program Administrator with the ability to request and receive accurate, Real Time quotes by connecting their in-house policy or management system with the SPARTA policy rating system. The transfer of information already entered in the policy or management system, combined with enhancing the data stream by incorporating existing SPARTA processes and rules, saves the Program Administrator duplicate entry and allows a true, Real Time round trip quoting experience. Providing trading partners with optimum technology solutions for ease of doing business, efficiency and speed to market is the overarching objective of the NxTech/SPARTA collaboration.

"NxTech has been able to easily integrate their interface technology solutions and team into our Organization which has resulted in a strong and important partnership. We look at them as an extension of our IT team for Agency Interface solutions" said Enrico Ferrante, Senior Vice President, Business Operations at SPARTA. "The implementation of the WC Real Time Callable Rating Interface not only significantly increased our quote and premium volume with our Program Administrator but now adds a valuable service offering for our entire portfolio of Program Administrators. We believe the NxTech interface solution coupled with SPARTA's overall technology platform, gives SPARTA a competitive advantage in our market space. We are presently working with NxTech to implement ACORD standard Agency downloads for all lines of business. NxTech is helping SPARTA achieve its goal of being an insurance IT leader and innovator".

Thad Bauer, President at NxTech commented, "SPARTA is providing their Program Administrator with a tremendous efficiency improvement to the Workers Compensation rating process. We were pleased to partner with the staff at SPARTA to bring this ease of doing business enhancement to their marketplace. SPARTA has developed a complete interface solution, and additional enhancements are on the horizon."

About SPARTA Insurance

SPARTA Insurance Holdings, Inc. (SPARTA) was formed in March, 2007 to develop an underwriting company specializing in unbundled Alternative Risk Transfer ("ART") and Specialty programs for the commercial property and casualty insurance market in the United States. SPARTA is an acronym for Specialty Program and Risk Transfer Alternatives and operates in two niche property and casualty insurance segments: Alternative Risk Transfer Programs ("ART") providing program level risk sharing through captive reinsurance and Specialty Insurance Programs ("Specialty") in which the risk is fully retained by SPARTA with risk sharing via a sliding scale. SPARTA is headquartered in Hartford, CT. For more information about SPARTA Insurance, call 860-275-6500 or visit www.spartainurance.com.

About NxTech, Incorporated

NxTech, headquartered in Milford, Ohio, was founded to provide technology to unlock data and integrate systems for the benefit of all participants within the insurance industry. Emphasizing Real Time straight through processing and download offerings with XML and ACORD standards, NxTech's reusable component architecture allows for a comprehensive and easily expandable solution.
